PROFESSIONAL SUMMARY

M.Tech CSE graduate with hands-on experience in Python, SQL, Java, C++, backend application development, REST API integration, debugging, and AI-based software systems. Built projects involving FastAPI, Node.js, SQLite, Streamlit, RAG pipelines, Agentic AI workflows, and structured data processing. Strong interest in building reliable, maintainable enterprise applications and AI/Data platform solutions in fast-paced engineering environments.

TECHNICAL SKILLS

- **Data Operations:** Data Entry, Data Validation, Data Auditing, Data Cleaning, Data Verification, Error Tracking, SLA Adherence, Discrepancy Resolution
- **Excel & Office:** MS Excel, MS Word, MS PowerPoint, Google Sheets, Reporting, Process Documentation, Data Entry Methods
- **API & Backend:** REST APIs, Postman, API Request/Response Testing, FastAPI, Node.js, JSON, CSV, SQLite
- **Programming & Data Tools:** Python, SQL, Java, C++, JavaScript, Pandas, NumPy, Scikit-learn, Git, Linux

WORK EXPERIENCE

Outlier / Remotask - AI Data Quality Reviewer

Oct 2023 - Feb 2024

- Reviewed structured AI-generated outputs across Python, C++, MySQL, and technical explanation tasks for correctness, clarity, grammar, edge cases, and instruction adherence.
- Performed quality checks against project guidelines, tracked recurring error patterns, and provided structured feedback to improve response accuracy by 30% and reduce failures by 25%.
- Followed task-specific SOPs, maintained consistency, and completed repetitive review work within expected quality and productivity standards.

PROJECTS

TriageIQ - Incident Data Processing System | [Github](#) | [Live Demo](#)

Mar 2026

Python, FastAPI, Streamlit, SQLite, Groq API

- Built an Agentic AI incident triage system that processes manual, CSV, and JSON incident records through a multi-agent workflow including Severity Agent, Root Cause Agent, Runbook Agent, and Summary Agent.
- Implemented structured data preprocessing, field validation, SQLite persistence, audit trail, confidence scoring, approval/rejection flow, and workflow tracking to support traceable incident review and operational decision-making.

AeroReserve - Airline Data Management System | [Github](#)

May 2023

React, Node.js, TypeScript, OpenSky API

- Developed a full-stack airline reservation system with React, TypeScript, Node.js, and Express, supporting flight search, booking management, real-time aircraft tracking, and structured API workflows.
- Integrated OpenSky API data to fetch and display real-time aircraft positions using request/response workflows and fallback data.

ScholarSync - Document Data Retrieval System | [Github](#) | [Live Demo](#)

Nov 2024

LangChain, Groq, ChromaDB, Streamlit

- Developed a document question-answering system for retrieving structured information from multi-document PDF datasets.
- Implemented document chunking, vector indexing, semantic retrieval, and answer validation against source documents.

RESEARCH & PUBLICATION

- Lead Author: Policy-Constrained Geospatial Intelligence: Integrating Deep Learning with Multi-Criteria Analysis for Solar Energy Planning, accepted at **IEEE AIEI 2026**, NIT Jamshedpur.
- Applied data cleaning, validation logic, multi-criteria analysis, and decision-support modelling on structured spatial datasets.

ACHIEVEMENTS & CERTIFICATIONS

- DSA: Solved **300+ problems** across coding platforms and earned **6 LeetCode badges**.
- Certifications: Deep Learning, AWS Fundamentals, Linux & Git.
- Leadership: Lead Volunteer at WREC'25, NIT Jalandhar; managed sessions for **200+ delegates**. Joint Secretary, BH3 Mess Committee; coordinated operations for **300** students.

EDUCATION

- **Dr. B. R. Ambedkar National Institute of Technology, Jalandhar – M.Tech in CSE** Aug 2024 - Jun 2026
CGPA: 7.87/10
- **Muzaffarpur Institute of Technology - B.Tech in IT** Aug 2019 - Aug 2023
CGPA: 8.07/10
